

Authorised party's Service Agreement, Appendix 2,
Delegated party's Service Agreement, Appendix 2

PRICING

1 INTRODUCTION

In accordance with the Service Agreement between Fingrid Datahub Oy (Datahub) and its Customer, this Pricing Appendix describes the pricing, fee components, and invoicing bases for authorised parties and delegated parties within the scope of the centralised information exchange service for the electricity trade.

2 FEE COMPONENTS AND INVOICING BASES

Datahub invoices customers with service agreements for the following fee components, in accordance with the agreement.

2.1 Basic fee

The basic fee covers the investment costs Datahub incurred before it began operating, as well as the costs of testing and certification related to the go-live. Datahub's customers will be charged the fee over the depreciation period, calculated in accordance with the Energy Authority's procedures for overseeing the fairness of Datahub's pricing. The basic fee will be paid equally by customers who connect to Datahub when it begins operations and customers who connect at a later date, in accordance with the remaining depreciation period. The basic fee is based on the number of accounting points that the Customer has in Finland (EUR per accounting point).

2.2 Fixed fee

The fixed fee covers Datahub's investment and operating costs.

2.3 The service fee is based on the number of accounting points for distribution system operators and electricity retailers

The service fee covers the annual operating expenses of the Datahub service, as well as development investments after the centralised information exchange service for the electricity trade goes live. The service fee is based on the number of accounting points that the Customer has in Finland.

2.4 Invoicing bases

If the Customer begins operations in the middle of the current month, the Customer will be charged the fixed fee, the setup fee, and the service fee in full for the current month.

The fixed fee is invoiced and charged to customers on a monthly basis. If the Customer has multiple service agreements with Datahub for different roles (e.g., electricity supplier and authorised party), the Customer will only be charged the fixed fee for the role with the highest fixed fee.

The basic fee and service fee are invoiced monthly according to the number of accounting points that the Customer has in the given month. Invoicing includes the accounting points with a status of 'connected', 'disconnected', or 'under construction' in the Datahub

system. The number of accounting points that the Customer has in the last hour of the last day of the month is used for invoicing.

Authorised parties are charged the basic fee and service fee based on the number of accounting points that the authorised party has.

Electricity market parties, distribution system operators and electricity suppliers, are charged the basic fee and service fee according to the number of accounting points that they have. If an electricity market party uses a service provider based on delegations, the service provider will not be charged separately for the basic fee or service fee for the number of accounting points included in delegations.

3 PRICING

The fixed fee is EUR 118 per customer per month.

The basic fee is EUR 0.013 per accounting point per month.

The service fee is EUR 0.034 per accounting point per month.
